COUNTY ACTION REQUESTED ON: Withlacoochee River Flood Inundation Map Project

HISTORY, FACTS AND ISSUES: In July 2016, the Lowndes County Board of Commissioners approved an agreement with the USGS to provide funding towards the development of a flood inundation map for a cross section of the Withlacoochee River which runs through Lowndes County and the City of Valdosta. While the preliminary work has been completed, delays resulting from numerous severe weather occurrences over the past year, combined with staffing shortages at the Federal level, have resulted in the finished product not being ready for publication within the time frame of the original agreement. The USGS has requested an addendum that will allow them additional time to complete the quality control checks and complete the process of converting the data into the finished map project.

OPTIONS: 1. Board's Pleasure

RECOMMENDED ACTION: Option 1.

DEPARTMENT: Emergency Management

Department Head: Ashley Tye

ADMINISTRATIVE COMMENTS AND RECOMMENDATION:

County Manager

Action Taken By Board: _____
