COUNTY ACTION REQUESTED ON: Emergency Fiber Replacement to South Lowndes

HISTORY, FACTS AND ISSUES: The current fiber that connects the South Lowndes Data Center and the E911 Center needs to be replaced. This fiber was installed in the late nineties and has been repaired so many times that the signal speed and quality are extremely degraded. The fiber was recently tested and is showing up to 10 splices have be done on some of the fibers and over half of the fibers are unusable. If there is another break, it will likely not be able to be repaired again.
